

## VOLTAGE PROTECTOR

The voltage protector can be used when the voltage is more than a certain rated voltage or current value or when the lighting exceeds a certain voltage. The power outlet will cut off the power to avoid the household from burning

Used as open/closed switch, Connect with relay

Models for any load applications to protect Fridges, Air-Conditioners and other refrigeration loads.

- Features:
- High reliability
- User-Friendly LED indications.
- Compact Size

Model No	BX-V070-220V
Operating voltage	220 VAC
Operation Voltage Range	140%
Operating Frequency	60 Hz
Minimum Allowable Voltage	165V AC
Maximum Allowable Voltage	260VAC
Disconnect Time Fault	5 second
Time Connection Load	3 Minutes
Output Capacity	30A, 1 HP,
Operating Temperature	-5°C +55 °C
High Relative Humidity	85%
Housing Material	PC
